KEYNOTE SPEAKER

JANET CARIONI

Janet is an Occupational Therapist, currently working within the school sector. Her clinical practice is shaped by her curiosity and continuous learning about the neurobiology of prenatal and childhood trauma. Janet is also an adoptive mother journeying into the teenage world with her two sons.

Possibilities Start With Safety

Janet will explore how all of us who interact with individuals with FASD at home, at work, or in the community, regardless of their age, have a role to play in fostering growth and nurturing possibilities. To encourage participation, we must first foster safety and build trusted relational connections to find regulation together.

Join us for a one-day conference that will highlight the power of connection and relationships to further our understanding and build capacity as professionals, caregivers, and contributors to the network of support.
